## DETAILED ACTION

### *Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-26, drawn to illumination color control of a camera flash, classified in class 348, subclass 371.
  - II. Claim 27, drawn to the optical components of a camera flash, classified in class 396, subclass 200.
2. The inventions are distinct, each from the other because they are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility, such as a flash that does not change color to produce white balance.

See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
